

*"A World Leader In Customized Dredging Solutions"*

# DREDUCATION

Dreducation® from DSC Dredge means “dredge education.” And while it also is the name of our annual dredge training class, Dreducation, for us, goes far beyond that literal, class-specific definition. Rather, Dreducation describes our commitment to furthering education and training about dredges and dredging.

Every dredging application is different, and every dredge operator works under unique conditions. It’s these variables that create your dredge’s own unique story. As leaders in the field of customized dredging solutions for special applications, we understand the unique characteristics of these applications, and we have a long history of support to our many industry organizations.

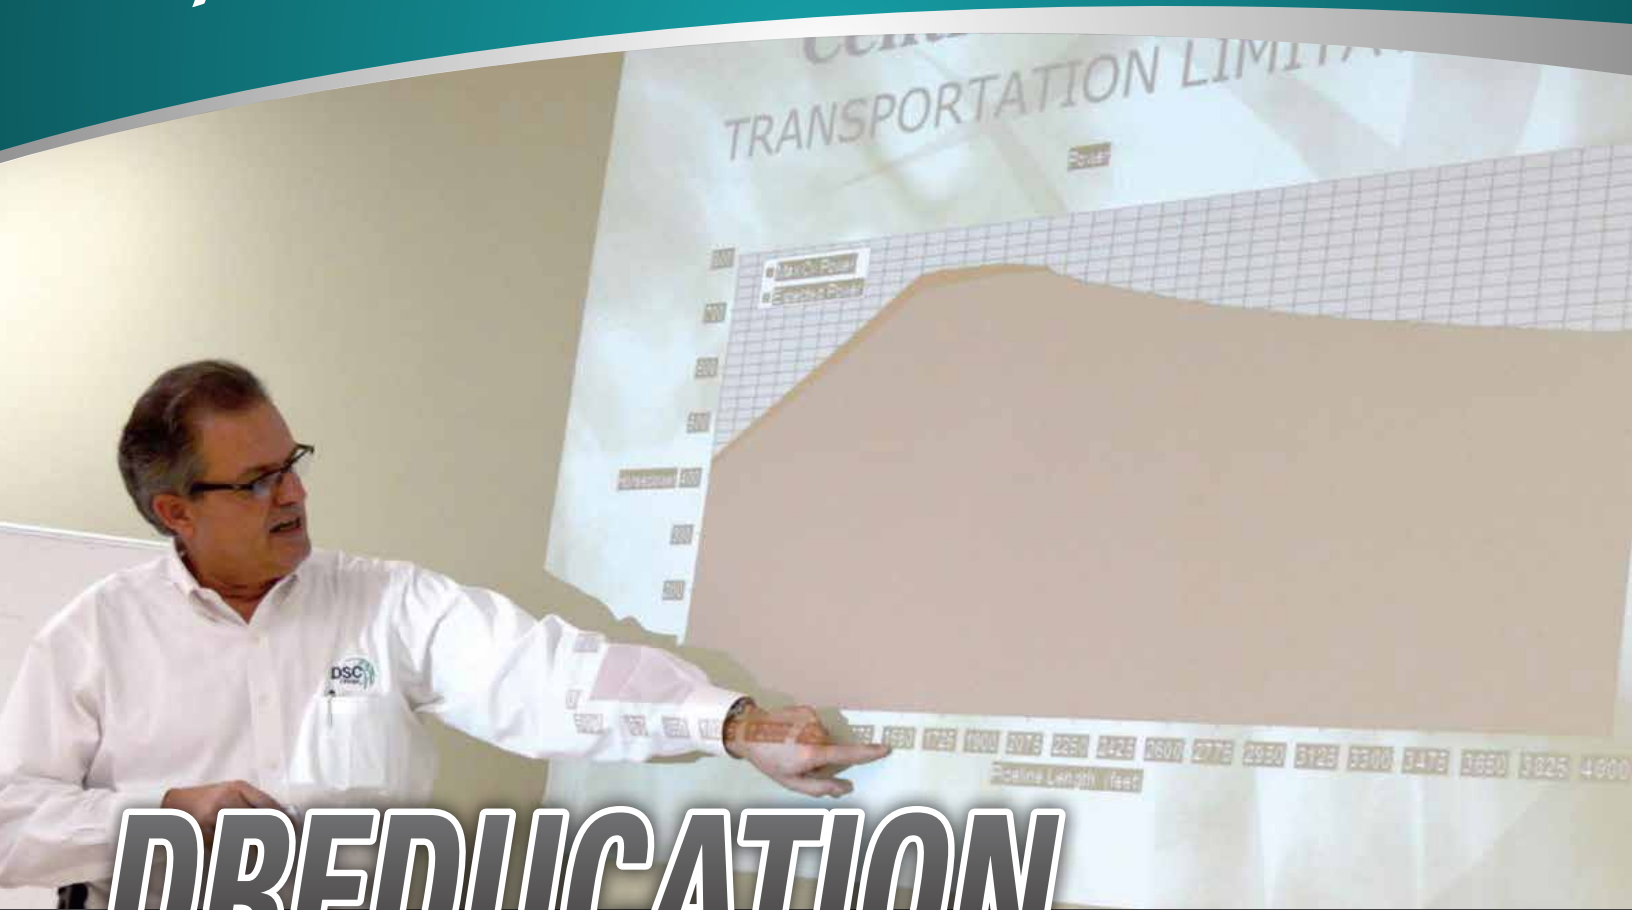

## ***What are some examples of DSC’s contributions to Dreducation?***

- Small Hydraulic Dredges course, presented annually at the Texas A&M Dredging Engineering Short Course
- Yearly presentations at the Western Dredging Association (WEDA) Annual Conference
- Onsite training in operation and maintenance at the point of dredge commissioning and startup
- Company-specific, on-location classroom training
- Annual DSC Dreducation Class— basic dredge operators’ training course that is hydraulic-dredge-specific, versus manufacturer- or brand-specific

**EVERY DREDGE *BEGINS* WITH A STORY**

# DREDUCATION®

At DSC Dredge, we know that proper education works hand-in-hand with experience to help you operate your dredge efficiently and at peak production. DSC offers several Dreducation® Class options that are designed to provide training for dredge operators and other personnel—from beginners to industry experts. These world-class courses are designed to be hydraulic-dredge-specific, not manufacturer- or brand-specific, resulting in classes that provide valuable insight and instruction for dredge professionals with all levels of experience.

## One-Day Basic Dredge Operator Training Classes

DSC's one-day basic Dreducation training classes are offered annually in New Orleans or by request at your location.

### Annual Class in New Orleans

Each year, DSC offers a one-day Dreducation class in New Orleans. This is a basic dredge operators' training course designed to educate both industry professionals and newcomers on how to become more productive, and enable them to work more efficiently. The class takes place in a group setting during the spring, between mid-March and mid-June, at a cost of \$450 per person.

### New Dredge Owner Operator Training

DSC provides dredge operator training to all new DSC dredge purchasers. This is a 2-day training course that includes our One-Day Basic Dredge Operator Training Class on the first day and hands-on, dredge-specific operator training covering your new dredge on the second day. Owners may choose to receive training at the DSC facility or on location with the dredge. For training at DSC, the purchaser is only responsible for lodging and transportation costs for their personnel. For onsite training, the purchaser is only responsible for the trainer's travel expenses, billed at actual cost.

For information about upcoming industry training opportunities, on-location classes and the next DSC Dreducation Class in New Orleans, please contact us at +1-985-479-1355 or email [dredge@dscdredge.com](mailto:dredge@dscdredge.com).

## Training Topics

Each training class DSC conducts has a flexible agenda and format that may be changed, depending on the scope and need of the training session. This ensures that the training class is tailored to fit your needs. Below are some topics that are covered in detail during training.

- What is a "Centrifugal Pump"?
- Excavating System
- Water & Slurry
- Lever Room
- Project Planning
- Dredging Techniques
- Booster Pumping

### Onsite Class at Your Location

DSC also offers basic dredge operator training on location for any company that wishes to train its personnel—on a fee basis, no matter what brand of cutter suction dredge they own. In addition to standard charges for this Dreducation training, the company is only responsible for the trainer's travel expenses, billed at actual cost. Please contact us for current training fees.
