

### The Ultimate Wood and Cellulose Blend for Premium Performance in Every Application

Profile® Blend Mulch and Blend Mulch with Tackifier combine 100% recycled Thermally Refined® wood fibers with best-in-class cellulose fibers to deliver enhanced water-holding capacity, allowing for better germination, fewer washouts and reduced callbacks. Blend mulch with tackifier comes pre-blended with tackifier, a three-dimensional blend of polymers and polysaccharides, to further reduce or minimize seed washout and erosion.

### Compared to Cellulose Alone, Profile Blend Mulches:

**Cover** 20% more ground

**Improve** the application of hydraulic mulch in a more uniform layer for better coverage and enhanced product performance

**Improve** moisture retention

**Improve** the suspension of mulch, seed and fertilizer within the slurry and prevent the dewatering of the fiber mulch

**Improve** application efficiency by increasing shooting distance and enhancing hose performance — greatly reducing downtime associated with clogging
