EroNet™ DS150™

Ultra-Short Term • Double Net • Straw Matrix •
Erosion Control Blanket

DESCRIPTION

DS150 temporary Erosion Control Blanket (ECB) is composed 100% weed free agricultural straw mechanically (stitch) bonded on two-inch centers between two photodegradable, synthetic nets. The netting of the DS150 ECB is treated to accelerate the degradation process. DS150 is recommended for applications requiring erosion protection for a period forty-five to ninety days. The material is fully degradable. The net and thread are photodegradable and the fiber matrix is biodegradable. Actual field longevity is dependent on soil and climatic conditions.

Each roll of DS150 is made in the USA and manufactured under Western Green's Quality Assurance Program to ensure a continuous distribution of fibers and consistent thickness.
