

## ENVIRONMENTALLY FRIENDLY DUST CONTROL

**FOR CONSTRUCTION, TRANSPORTATION,  
AND RENEWABLE ENERGY DEVELOPMENT**

DustRX Hydro is specifically formulated for application using both watering trucks and hydroseeding equipment providing you a way to extend your season and offer more services.

This USDA Certified Biobased Product offers an environmentally friendly solution to fugitive dust control. Profile Products' soil health experts took an agronomic approach to create a formula that doesn't degrade soils, impede vegetation or introduce synthetic polymers to the environment, all while eliminating challenges in the loading, mixing and application process.

DustRX Hydro offers a dust suppression solution for construction sites, unpaved light-traffic roads, parking lots and recreational venues. Free of solvents and chlorides, DustRX Hydro is non-corrosive on hydroseeding equipment and water trucks.

- Maintains soil and vegetation health
- Environmentally friendly
- 100% Biodegradable and Non-toxic
- Water Truck or Hydroseeder-applied formulation
- Water Soluble
- Optimal Bonding and Elasticity when applied to fine materials
- Effective at high dilution rates

DustRX Hydro represents a groundbreaking, environmentally friendly dust control solution that is entirely biodegradable and engineered for utilization in conventional water trucks and hydroseeders. The fine particles are coated with a proprietary agent that briefly delays the hydration process upon introduction into the water tank. This unique feature ensures that the product disperses uniformly in water before becoming a soluble, yielding a seamless, clump-free mixture ideal for a variety of dust control applications.

### Agronomic Solution

Setting out to develop a temporary solution to fugitive dust, Profile Products created an agronomically and environmentally responsible formulation. Unlike salt-based or synthetic polymer alternatives, DustRX Hydro does not degrade soil, adversely affect surrounding vegetation, or introduce synthetic polymers to the jobsite.

### Dust Suppression Performance

With greater functional longevity than traditional watering practices, you benefit from reduced water usage and fuel consumption on the jobsite. Experience cost savings on construction sites, maintenance roads, mining and energy development sites. DustRX Hydro is also a great solution for recreational venues, fair sites and equine arenas.

### Ease of Application

DustRX Hydro is specifically formulated for use in watering trucks and hydroseeders. Spray from the hydroseeder tower or hose without fear of clumping, fisheyes or corrosive wear on equipment.

Formulated with a temporary dye, gain visibility of your coverage when applying. This helps installers to ensure uniform coverage and avoid over-application inefficiencies. See where the products is applied – then watch the color fade away and become a clear dust control solution as it dries.

Fugitive dust on jobsites can increase maintenance costs, decrease productivity and adversely affect the health of workers and the surrounding community. By controlling dust, contractors, mine, and transport operators can better meet environmental, regulatory and community requirements and reduce profit loss on projects.
