

SITEDRAIN™ DS-110 SERIES

PREFABRICATED SHEET DRAIN

PRODUCT OVERVIEW

SITEDRAIN DS-110 Series geocomposite sheet drain products are composed of a dimpled polymeric perforated core with a geotextile bonded to both sides. The geotextile allows water to pass through while retaining backfill materials. The perforated core allows water collection from both sides and provides a continuous flow path to designated drainage exits.

SITEDRAIN DS-110 Series products provide an economical solution for double-sided subsurface drainage applications requiring low strength and high flow capacity. Various geotextile options are available to meet project-specific requirements.
