

Vintage™ 6 is a three-piece, split face, tumbled retaining wall system that recreates the distinctive appeal of an old stone wall. Its double sided blocks build vertical retaining/freestanding walls and outdoor living features with ease. Like the original six-piece Vintage system, Vintage 6 makes the industry's first 8' radius without cutting. Simple, elegant and strong, Vintage 6 creates a timeless appeal that other wall systems can't.

Vintage™ 6

The Advantages of the Vintage™ 6 System...

It's Fast...

Located on the underside of each Vintage 6 block is a 4" x 4" Anchor Bar that makes installation a breeze. The Anchor Bar ensures Vintage 6 builds perfectly vertical and has the highest shear resistance in the industry.

It's Simple...

The interlocking channel on top of each Vintage 6 block provides for quick installation of retaining walls, garden walls, seat walls and pillars.

It's Strong...

In addition to the Anchor Bar, the Vintage 6 block's unique design not only resists the forces of tumbling, but the elements as well. Upon assembly, Vintage 6 blocks create a 4" diameter "stone column". When layered with grid, the gravel filled stone columns provide a multi-point interlock, resulting in a more uniform block-to-grid mechanical connection.

It's Versatile...

Three unique, double-sided Vintage 6 blocks make it easy to recreate the timeless beauty of a naturally weathered stone wall, planter, pillar or outdoor living feature. Its patented design builds straight walls or an 8' radius without cutting.
